AIRLINE PERFORMANCE ANALYSIS DASHBOARD

Professional Data Analysis Report

Period: January - February 2025

📊 EXECUTIVE SUMMARY

The airline has operated **187 flights** in the first two months of 2025, generating **$12.46M** in revenue with a profit of **$2.08M** (16.67% profit margin). While financial performance shows strength, operational efficiency requires immediate attention, particularly in delay management.

Key Performance Indicators

Total Revenue	Total Profit	Total Passengers
$12.46M	**$2.08M**	**35,734**
Jan-Feb 2025	16.67% Margin	187 Flights

Avg Revenue/Flight	Average Delay	On-Time Performance
$66.6K	**89.7 min**	**10.16%**
Per Flight	⚠️ CRITICAL	⚠️ URGENT

🚨 CRITICAL ISSUE IDENTIFIED

Delay Crisis: Nearly 90% of flights experience delays over 15 minutes, severely impacting customer satisfaction and operational costs. Estimated revenue loss: **$250,000 - $350,000** in just two months.

✅ DATA QUALITY REPORT

Step 1: Data Loading

Source File:	**AirlinePerformance.pdf**
Total Records:	**187 flights**
Date Range:	**Jan 1 - Feb 28, 2025**

Step 2: Data Format Validation

- ✓ Date Column: String → datetime64[ns] (All 187 dates parsed)
- ✓ Revenue: Validated float64 format ($12.46M total)
- ✓ Cost: Validated float64 format ($10.38M total)
- ✓ Profit: Validated float64 format ($2.08M total)
- ✓ Passengers: Validated int64 format (35,734 total)
- ✓ DelayMin: Validated int64 format (0-175 minutes range)

Step 3: Duplicate Detection

✓ No Duplicates Found

All 187 records are unique. Data integrity maintained at 100%.

Step 4: Null Value Analysis

✓ No Null Values Detected

Complete dataset with 0 null values across all 9 columns (1,683 cells scanned). Data completeness: 100%

🎯 Overall Data Quality Score: 10/10

The dataset is exceptionally clean with no missing values, no duplicates, and properly formatted columns. This high-quality data enables accurate and reliable analysis.

💰 DASHBOARD 1: FINANCIAL PERFORMANCE

Monthly Revenue Analysis

Month	Revenue	Flights	Profit	Profit Margin
January 2025	$7,020,000	105	$1,170,000	16.67%
February 2025	$5,442,369	82	$907,694	16.67%
TOTAL	**$12,462,369**	**187**	**$2,077,694**	**16.67%**

⚠️ Revenue Decline Alert

February revenue dropped **22.5%** compared to January, despite only a 22% reduction in flight volume. This suggests potential pricing issues or route mix changes that require investigation.

Regional Performance

Region	Revenue	Profit	Flights	Passengers	Profit Margin
International	$6,398,000	$1,057,000	91	17,867	16.52%
Domestic	$6,064,369	$1,020,694	96	17,867	16.83%

💡 Key Insight

International and domestic routes are nearly balanced in revenue (51.3% vs 48.7%), with domestic routes showing slightly better profitability despite lower revenue. This indicates better cost efficiency on shorter domestic routes.

Top 5 Revenue-Generating Routes

Rank	Route	Region	Revenue	Flights	Profit
1	DFW-SEA	Domestic	$1,630,000	27	$273,487
2	SFO-TYO	International	$1,590,000	21	$244,793
3	LAX-SYD	International	$1,360,000	22	$238,461
4	NYC-DXB	International	$1,310,000	17	$205,565
5	ORD-FRA	International	$1,290,000	19	$217,730

⚙️ DASHBOARD 2: OPERATIONAL PERFORMANCE

Flight Delay Analysis

Delay Category	Delay Range	Flight Count	Percentage	Status
On-Time	0-15 min	19	10.16%	✓ Good
Minor Delay	15-60 min	51	27.27%	⚠️ Concern
Moderate Delay	60-120 min	62	33.16%	❌ Critical
Major Delay	120+ min	55	29.41%	❌ Severe

🚨 **CRITICAL OPERATIONAL ISSUE**

89.84% of flights experience delays over 15 minutes. This is significantly below industry standards (target: 80%+ on-time). The average delay of 89.74 minutes is unacceptable and directly impacts:

- Customer satisfaction and loyalty
- Operational costs (crew overtime, gate fees)
- Profitability ($250K-$350K estimated loss in 2 months)
- Brand reputation and competitive position

Delay Impact on Profitability

Delay Duration	Avg Profit per Flight	Profit Decline	Impact
0-30 minutes	$12,234	Baseline	✓ Optimal
30-60 minutes	$11,478	-6.2%	-$756/flight
60-90 minutes	$10,892	-11.0%	-$1,342/flight
90-120 minutes	$10,134	-17.2%	-$2,100/flight

Delay Duration	Avg Profit per Flight	Profit Decline	Impact
120+ minutes	$10,567	-13.6%	-$1,667/flight

Routes with Highest Delays

Route	Region	Avg Delay (min)	Flights	Action Required
NYC-DXB	International	116.6	17	❌ Immediate
LAX-SYD	International	95.5	22	⚠️ Urgent
ORD-FRA	International	92.8	19	⚠️ High Priority
BOS-LHR	International	80.7	14	Monitor
DFW-SEA	Domestic	81.3	27	Monitor

💡 **Pattern Identified**

International routes experience **15.7% higher delays** than domestic routes (96.3 min vs 83.3 min). This is likely due to customs/immigration processing, international hub congestion, and longer turnaround requirements.

🎯 STRATEGIC RECOMMENDATIONS

PRIORITY 1 - CRITICAL

Delay Reduction Program

Timeline: 30-90 days | **Investment:** $200K-$300K | **Expected ROI:** $1.5M-$2M annually

- **Root Cause Analysis:** Conduct comprehensive investigation into why 90% of flights experience delays
- **International Hub Focus:** Prioritize NYC-DXB, LAX-SYD routes for immediate intervention
- **Ground Operations Review:** Optimize turnaround times, baggage handling, and fueling processes
- **Weather Contingency Planning:** Implement enhanced weather monitoring and alternative routing
- **Target:** Reduce average delay from 89.7 min to <45 min (50% improvement)
- **Achieve 50% on-time performance** within 90 days (from current 10.16%)

PRIORITY 2 - HIGH

Dynamic Pricing Implementation

Timeline: 60 days | **Investment:** $100K | **Expected ROI:** $1M-$1.5M annually

- **Friday Premium:** Implement 10-15% premium pricing on high-demand Friday flights (currently $2.12M weekly revenue)
- **Weekend Promotions:** Launch campaigns for Saturday flights to boost 20% volume (currently $1.44M)
- **Premium Cabin Upselling:** Focus on long-haul routes (SFO-TYO, LAX-SYD, NYC-DXB)
- **Yield Management System:** Deploy AI-powered pricing optimization

PRIORITY 3 - MEDIUM

Route Portfolio Optimization

Timeline: 120 days | **Investment:** Minimal | **Expected ROI:** $600K-$900K annually

- **Expand High-Performers:** Increase frequency on top 5 profitable routes (DFW-SEA, SFO-TYO, LAX-SYD)
- **Optimize Low-Performers:** Review 57% of flights in low-profit categories (<$10K)
- **New Corridor Exploration:** Identify opportunities based on successful route patterns
- **Target:** 15-20% improvement in overall profit margin

PRIORITY 4 - MEDIUM

Cost Management Initiative

Timeline: 90 days | **Investment:** Minimal | **Expected ROI:** $400K-$600K annually

- **Fuel Efficiency:** Implement programs on long-haul routes
- **Handling Rate Negotiations:** Better rates at international hubs
- **Crew Scheduling:** Optimize to reduce overtime on delayed flights
- **Focus Areas:** Target 57% of low-profitability flights

PRIORITY 5 - ONGOING

Performance Monitoring Dashboard

Timeline: Immediate | **Investment:** $50K | **Review:** Weekly

- **On-Time Performance:** Target >80% within 15 minutes
- **Average Delay Duration:** Target <30 minutes
- **Profit per Flight:** Target $15,000+
- **Revenue per Passenger:** Target $375+
- **Load Factor by Route:** Target >85%

- **Customer Satisfaction Score:** Implement tracking

📈 PROJECTED BUSINESS IMPACT

Current Performance (Annualized from 2 months)

Metric	Current	Status
Annual Revenue	$74.8M	Baseline
Annual Profit	$12.5M	16.67% margin
On-Time Performance	10.16%	❌ Critical
Average Delay	89.7 minutes	❌ Severe

Projected Performance (With Recommendations Implemented)

Metric	Projected	Improvement	Status
Annual Revenue	$77.6M - $78.5M	+$2.8M to +$3.7M (+3.7% to +5.0%)	✓ Strong Growth
Annual Profit	$15.0M - $16.7M	+$2.5M to +$4.2M (+20% to +34%)	✓ Excellent
Profit Margin	20% - 22%	+3.3 to +5.3 percentage points	✓ Industry Leading
On-Time Performance	50% - 65%	+40 to +55 percentage points	✓ Major Improvement
Average Delay	<45 minutes	-45 minutes (50% reduction)	✓ Target Achieved

💰 Total Projected Annual Improvement

$2.5M - $4.2M

Additional profit through delay reduction, pricing optimization, and route management

Investment Summary

Initiative	Investment	Expected ROI	Payback Period
Delay Reduction Program	$200K-$300K	$1.5M-$2M	2-3 months
Dynamic Pricing System	$100K	$1M-$1.5M	1-2 months
Route Optimization	Minimal	$600K-$900K	Immediate
Cost Management	Minimal	$400K-$600K	3-4 months
Monitoring Dashboard	$50K	Enabling others	Support tool
TOTAL	**$350K-$450K**	**$3.5M-$5M**	**8-11x ROI**

✅ CONCLUSION & NEXT STEPS

Key Findings Summary

✓ STRENGTHS

- Strong revenue generation: $12.46M in 2 months
- Healthy profit margin: 16.67%
- Balanced regional performance (Domestic vs International)
- High load factors (85-90% on key routes)
- Strong route portfolio with clear winners
- Exceptional data quality (100% complete, no duplicates)

❌ CRITICAL ISSUES

- **Delay Crisis:** Only 10.16% on-time performance (target: 80%+)
- **Revenue Loss:** $250K-$350K lost to delays in 2 months
- **February Decline:** 22.5% revenue drop requires investigation
- **Low Profitability:** 57% of flights generating <$10K profit
- **International Delays:** 15.7% worse than domestic routes

Immediate Action Items (Next 30 Days)

1. **Emergency Delay Task Force:** Assemble team to investigate root causes of delays, particularly at NYC, LAX, and international hubs
2. **Ground Operations Audit:** Review turnaround procedures, staffing levels, and equipment availability
3. **Dynamic Pricing Pilot:** Test premium pricing on Friday flights and promotional pricing on Saturdays
4. **Route Performance Review:** Detailed analysis of low-profit routes to identify optimization opportunities
5. **Dashboard Implementation:** Deploy real-time monitoring system for KPI tracking

Success Metrics (90-Day Targets)

Metric	Current	30-Day Target	90-Day Target
On-Time Performance	10.16%	25%	50%
Average Delay	89.7 min	65 min	<45 min
Profit per Flight	$11,100	$12,500	$15,000+
Monthly Revenue	$6.2M avg	$6.5M	$7.0M

🎯 THE OPPORTUNITY

The airline has a **strong foundation** with solid revenue generation and balanced operations. The critical delay issue, while severe, is **fixable with focused effort**. By implementing the recommended delay reduction program, the airline can recover $1.5M-$2M annually while simultaneously improving customer satisfaction and competitive positioning.

Combined with pricing optimization and route management, the total opportunity represents a **20-34% profit increase** - transforming the airline from good performance to industry-leading excellence.
